Agreement in principle on nursing pay equity

22 December 2021

An agreement in principle has been signed in the nursing pay equity claim covering DHB members of the NZNO and PSA and other employees whose work is also covered by the unions claim.

After the holiday period the parties will be confirming the documentation along with details of the increases and the translation from existing rates to the new pay equity rates and this will be ready for distribution to the DHBs' nursing workforce in the New Year. This will then be presented to the 40,000 DHB employed nurses for DHBs for ratification.

We recognise the historical significance of the nursing pay equity settlement.

If you have any questions about pay equity you can check the [FAQs](#) on the TAS website.
